

TREES COMMITTEE REPORT

JANUARY 23, 2024

The 2024 Tree Pruning & Basic Maintenance Program Started in December and is on schedule barring any weather related delays will finish as planned. The use of “outside Contractors and leasing of high lift equipment as needed” continues to work well both budget and work wise.

Tree and Ornaments shrub replacement will re-start in early Spring continuing the successful 2023 work. In addition to replacing those that have been damaged by various causes Maintenance is preparing a schedule for installing new trees and ornaments as requested by residents. The advanced scheduling have helped “manage” work order back log.

Once again we are all reminded to use extra caution when driving through areas where tree work is in progress and to stay clear of the chipping machine which will be near the lift.
